IDENTIFIERS Survey of Voluntary Support of Education

ABSTRACT

Results of the 1984-1985 Survey of Voluntary Support of Education are presented, including a narrative summary and detailed statistical tables. Reports of voluntary support are presented for 979 four year colleges and universities, 135 two year colleges, and 434 independent precollege schools. The tables for each institution cover: total financial support, support for current operations, support for specific capital purposes, and the sources of support (e.g., alumni, foundations, religious organizations). National estimates of voluntary support to higher education are provided by source and purpose for 1979-1980, 1983-1984, and 1984-1985. Data are included on voluntary support in relation to enrollment, inflation, and institutional expenditures for 1949, 1965, 1970, 1975, 1980, 1983, and 1984. Voluntary support for 1984-1985 is detailed by type of college/university and changes from the previous year, including contributions to the annual fund by alumni/donor. Also covered are: funding to different types of colleges through matching-gift programs and gifts of property; gifts donated for specific purposes; support with restrictions on its use; and gifts from individuals for current operations in the amount of "under $5,000" or "$5,000 or more." 30th Anniversary Survey Report

Voluntary Support of Education is published annually by the Council for Financial Aid to Education, Inc. Additional copies are available for $25 each prepaid from the Council at 680 Fifth Avenue, New York, NY 10019.

Highlights

Higher Education

National Estimates indicate that

- Total voluntary support rose $720 million in 1984-85 to an estimated $6.32 billion, up 12.9 percent over 1983-84
- Corporate support rose 23.8 percent to a record $1.574 billion, comprising 24.9 percent of total voluntary support and surpassing total grants from any other donor group

Reports from Participating Colleges and Universities show that

- Two groups of institutions—private and public doctoral universities—each raised more than $1 billion, 61.2 percent of the total support reported by the 1,114 colleges and universities participating in the survey
- The average alumni/ae gift to the annual fund rose 4.4 percent to $118.45, with participation at 20.3 percent
- Corporate matching-gift grants rose to $99.4 million, 7.5 percent of total corporate support
- Gifts of property totaled $400.2 million, including $179.7 million in company products and $151.9 million in other property from noncorporate donors
- Unrestricted gifts continued to decline, providing only 22.2 percent of total support. Research received the largest share of current-operations funds, student aid and faculty compensation the largest shares of endowment gifts

Independent Elementary and Secondary Schools

Reports from the Independent Schools show that

- The 434 participants received $302.7 million in 1984-85, compared with $280.1 reported in 1983-84 by 451 schools
- Gifts from individuals provided for 77.0 percent of total support, up from 75.5 percent in 1983-84. Gifts from corporations rose 37.0 percent
- Just under half of all gifts were unrestricted, mostly from individuals
- A record 29.7 percent of alumni/ae responded to annual-fund solicitations and gave a record average gift of $141.20, up 9.3 percent over 1983-84

Voluntary Support of Education 1984-85

30th Anniversary Survey Report

The Sponsoring Organizations

The Council for Financial Aid to Education, Inc. (CFAE) is a not-for-profit corporation based in New York City and funded by contributions from business. It was established in 1953 as the instrument of the business community charged with encouraging private support of education. It provides consulting and research services, conducts workshops and seminars, produces periodicals and "how to" manuals, and sponsors the public service advertising campaign "Give to the college of your choice."

The Council for Advancement and Support of Education (CASE) is a professional educational association with nearly 2800 institutional members which offers programs of professional development and acts as a public affairs arm for U.S. education. Participants in its programs include fund raisers, alumni administrators, communicators, government relations officers and the managers of these functions in postsecondary and secondary institutions. **CASE** is headquartered in Washington, DC.

The National Association of Independent Schools (NAIS), Boston, is a nonprofit voluntary membership association of nearly 1,000 schools in the U.S. and overseas serving a total enrollment of 340,000 students. Its administrative and academic services to member schools include research reports, periodicals and manuals; an employment clearinghouse for school administrators; and leadership and professional development for teachers, administrators and school trustees.

May 1986

Preface

Voluntary Support of Education 1984-85 marks the 30th anniversary of the Council's first effort to measure private support of higher education in this country, and is the latest in a series of 26 pioneering studies of educational philanthropy beginning in 1954-55.

The survey has changed a great deal in terms of comprehensiveness and sophistication since the mid-1950s. The most recent restructuring occurred in 1983-84 to reflect the more precise and detailed definitions of sources and purposes for reporting gift income as defined in *Management Reporting Standards for Educational Institutions: Fund Raising and Related Activities*, published in January 1983 by the Council for Advancement and Support of Education and the National Association of College and University Business Officers.

Voluntary support excludes income from endowment and other invested funds as well as all support received from federal, state and local governments and their agencies; in editing the survey questionnaires, CFAE deleted all income from these sources when so identified by a reporting institution. Any enrollment figures not supplied by the colleges and universities were taken from the *hep 1985 Higher Education Directory*. Enrollment data supplied by the independent schools may differ from figures published elsewhere because of timing differences for the reports.

Most of the data supplied by the participating institutions since 1965-66 have been stored on magnetic tape. They are therefore available for supplementary studies of educational philanthropy.

We are grateful for the participation of the distinguished cosponsors of the survey, the Council for the Advancement and Support of Education and the National Association of Independent Schools, and for the cooperation of several other national organizations. Thanks too for the generous financial support of the Reader's Digest Foundation in helping with the publication of the survey results. And finally, we express our great appreciation—and admiration—to the more than a thousand college and school administrators who painstakingly filled out the questionnaires upon which this work depends.

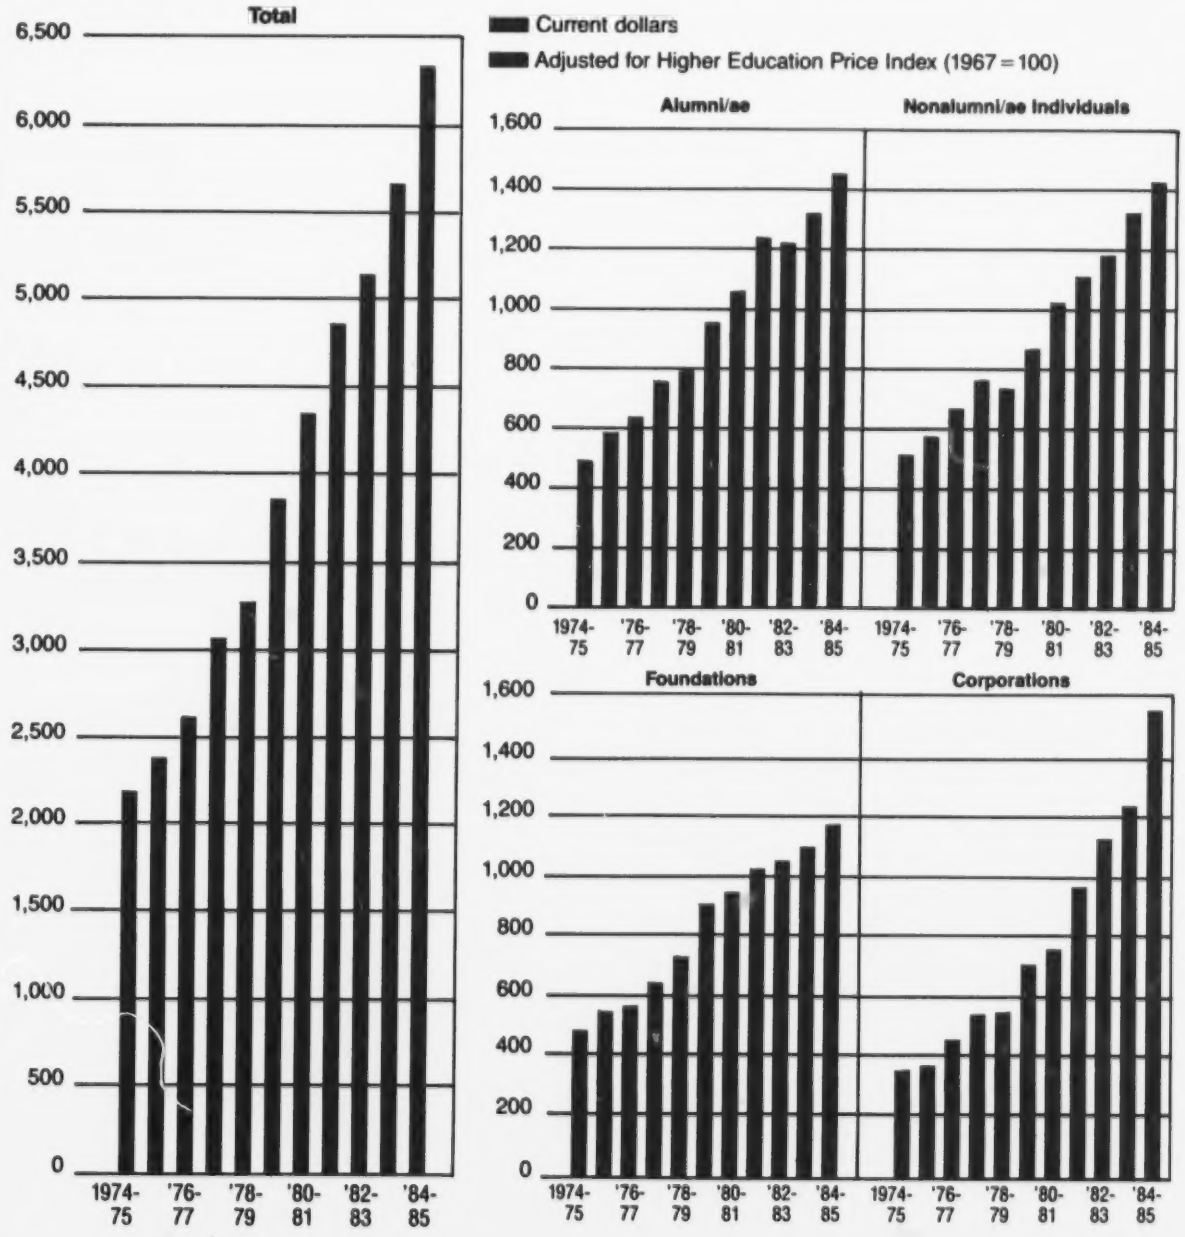
Chart 1. Estimated Voluntary Support of Colleges and Universities by Major Sources and in Total (millions of dollars)



I

National Estimates

Voluntary support of colleges and universities increased in 1984-85 for the tenth year in a row. Rising to an estimated $6.32 billion, it has almost tripled since 1974-75, the last year in which gifts declined.

The 12.9 percent rise of $720 million in gifts far exceeded the inflation rate, whether measured by the Consumer Price Index (CPI) or the Higher Education Price Index (HEPI), an index of the cost of goods and services purchased by higher education institutions. (See *Chart 1* and *Table 1.*)

By Source

In 1984-85, for the first time ever, corporations gave more than any other donor group. Their 23.8 percent increase was also the largest recorded by any of the donor groups. Corporate support of higher education began this extraordinary and steady growth in 1970-71 and now accounts for 24.9 percent—nearly one quarter—of total voluntary support.

As in the last several years, some of the rise came from a continuing surge in gifts of company products. These gifts were encouraged by the enhanced tax deduction provided by the Economic Recovery Tax Act of 1981 (ERTA) for company-manufactured items donated for use in research, and training in research, in biological and physical sciences. The reported value of these gifts since the survey began collecting data about them in 1982-83 has tripled, from $59 million to $180 million in 1984-85. Keep in mind that the amounts reported by the colleges reflect the market value of the property, not the tax-deductible value generally reported by the corporate donors.

Alumni/ae gifts reversed the pattern seen in 1983-84 and once more surpassed support from nonalumni/ae individuals—parents, trustees, faculty and friends of the institutions. Gifts from all individuals provided slightly less than half of total voluntary support, with alumni/ae accounting for 23.1 percent and nonalumni/ae individuals 22.4 percent.

Foundations continued to provide a shrinking share of total support to higher education institutions. Their grants dropped from a high of 23.9 percent of all voluntary support 11 years ago to 18.6 percent in 1984-85.

The proportion of gifts from religious organizations also continued the downward trend that began in the late 1950s. Religious groups provided 10.3 percent of all private gifts in 1958-59 and 3.3 percent in 1984-85. Many of the private colleges that were once either church related or church controlled have since become independent and thus rely less on support from their religious affiliation than in the past.

As can be seen in Table 1, support from three of the major donor groups—alumni/ae, other individuals and corporations—has risen in both actual dollars and in dollars adjusted for changes in the HEPI. Gifts from foundations and religious organizations, on the other hand, have not kept up with inflation.

*Includes nonrecurring transfer of $105 million from the Emily and Ernest Woodruff Fund, Inc., to Emory University for unrestricted endowment.

By Purpose

Because the survey was restructured in 1983-84, it is not yet possible to estimate breakdowns of gifts by purpose beyond the amounts given for current operations versus capital purposes. Although gifts for capital purposes rose slightly faster than those for current operations, the latter still account for over three fifths of all support. Prior to 1969-70, less than half of all private gifts were channeled into current operations. In the first half of the 1970s, slightly more than half went to current operations; since then over 60 percent of the funds raised have been so designated. Increased fund raising by public institutions is partly responsible, as more than two thirds of the funds raised by public colleges and universities are for current operations.

Institutional Expenditures and Voluntary Support

Voluntary support is only one of several factors affecting the economic condition of higher education. Changes in enrollment and the inflation rate also affect institutional expenditures and the ability of college budgets to withstand external pressures. *Table 2* examines the interrelationships between these factors and presents some good news.

First, expenditures per student—often used as one measure of quality—rose both in current and inflation-adjusted dollars. This came as a result of a 1.8 percent decline in enrollment coupled with a 6.6 percent increase in expenditures, a higher rate than inflation as measured by the CPI.

Second, voluntary support grew at a faster rate than inflation, whether measured by the CPI or the HEPI, and therefore provided an increasing share of institutional budgets. Its importance has been slowly creeping up, although it still has not reached the levels seen in the 1950s and 1960s.

The future will continue to present difficulties for college and university budgets. Faculty pay still lags behind professional and managerial salaries in business and some other fields. Maintenance of equipment and buildings, deferred during the years of high inflation, and the

replacement of obsolete instrumentation and facilities cannot be put off any longer. Pressures from the public and from legislators to improve the "quality" of college curricula conflict with the need to provide remedial reading, writing and mathematics to those students not capable of handling college-level work. And inflation still threatens college budgets, even though to a much lesser degree than during the years of double-digit rates.

Sources of revenue are also uncertain. The traditional student population cohort of 18-to-21-year-olds is still dropping. Although total enrollment has declined only minimally, an increasing share of today's students are part-time rather than full-time and produce less tuition income. If tuition is raised too high, many of those currently enrolled, as well as some potential students, will pursue other activities. Meanwhile both state and federal student aid appropriations have shrunk, as have federal funds for research. Despite the expansion of voluntary support, its contribution to total institutional revenue is not sufficient to offset current and expected cutbacks.

That voluntary support has continued to rise despite the sluggish economy of recent years and the uncertain economic future is encouraging. Clearly, colleges have been successful in presenting their case to potential donors. With continuing efforts to demonstrate the critical role of higher education in our complex, knowledge-intensive society, they should be able to do so in the future.

II Survey Results

The actual figures reported by the participants in the survey are used in this section for two kinds of analysis: 1) details about fund raising in the most recent year—the recipients, the donors and the purposes specified for their gifts; and 2) changes over time.

Analyses over time present problems not encountered when analyzing results from a single year. Many institutions participate in the survey every year, but others respond only sporadically. Meaningful comparisons between years require identical, or "core," groups of respondents in each of the years under scrutiny. This core group will of course be smaller than the total number of respondents in any of the years being compared.

Most of the tables in this section correct for these problems in two ways: 1) by using averages per institution, to adjust for different numbers of respondents in each of the years; and 2) by looking at the experiences of the "core" groups for comparison over time—usually two years.

The Recipients

Almost the same number of colleges and universities responded to the survey in 1984-85 as in 1983-84, although the characteristics of the participants in the two years were different. The 1,114 institutions in the 1984-85 survey reported good news—an increase of $609,622,641 in total voluntary support over that reported by 1,118 institutions in 1983-84. This represented a 13.4 percent jump in the average amount raised by each of the colleges in 1984-85 over 1983-84.

Once again the doctoral institutions—both public and private—as groups each raised more than $1 billion. Together, their support comprised 61.2 percent of total voluntary support reported by all. (See *Table 3.*) Efforts of the public institutions were particularly successful in 1984-85, with most categories of institutions reporting increases of 15 percent or better in the average funds raised per institution. The comprehensive public colleges recorded a 43.1 percent rise in average institutional support. In all groups but one the private colleges showed smaller increases than did their public counterparts.

Since 1974-75 the number of four-year public colleges responding to the survey has risen by almost a third, while the number of private four-year respondents has grown by less than 10 percent. During that period total support recorded by the public institutions had quadrupled, while support for the private colleges almost tripled. The four-year private colleges and universities still receive more gifts than do their publicly supported peers, but the latter are rapidly reducing the disparity.

Table 3. Voluntary Support by Type of Institution, 1983-84 and 1984-85 (000 omitted)

But in all groups except the specialized colleges, the average per institution was more than twice as large for the privates as for the publics.

The two-year colleges were not to be left out in 1984-85. Many of them are now raising private funds more aggressively and systematically than in the past. A large share of their extraordinary increases results from gifts of company products and other in-kind items. Several also received large bequests, undoubtedly as a result of intensive solicitation of alumni/ae and friends in their communities.

The core group of institutions reported support patterns that are generally similar to those recorded by the total group, although there are some interesting exceptions. The public comprehensive and general baccalaureate institutions that reported only in 1984-85 were quite different from their respective core groups. The newcomers to the survey among the comprehensive colleges on average raised more funds than the core institutions, thus pushing up the average per institution and the percent change in that average greatly. The first-time reporting baccalaureate institutions on average raised less support than their core peers, and so influenced the overall group average only slightly, thus accounting for the very small percentage increase in the average. The public and private two-year institutions also exhibited disparities between the changes recorded by the total groups and the core groups between 1983-84 and 1984-85.

(Figures in parentheses show percent of total in each column.)

The Donors

Gifts from three donor groups—alumni/ae, other individuals and corporations—averaged more than $1 million each per institution for the first time in 1984-85 (see *Table 4*). Indeed, average corporate support per institution surpassed average support from alumni/ae and accounted for the largest share of total voluntary support. Gifts of company products and other property provided a large proportion of this growth. Better reporting of these gifts explains some of the increase. The differences from year to year in gifts from parents and other individuals are somewhat illusory. More institutions are now reporting gifts from parents, but many still do not keep them separate and allocate parents' gifts to "other individuals." As more institutions refine their data collection and reporting systems, the survey will be able to analyze trends more accurately.

The change patterns exhibited by the groups of core institutions are remarkably similar to those seen with the total group of respondents.

Special Forms of Giving

Respondents were asked to provide details about several ways of giving. The *annual fund* has long been a favored technique for soliciting unrestricted gifts from alumni/ae. Individuals are encouraged to make testamentary provisions for colleges through *bequests* or various forms of *deferred gifts* with trusts, pooled income funds and annuities. Many companies have established *matching-gift programs* to enhance their employees' gifts to higher education. Passage of the Economic Recovery Tax Act in 1981 encouraged gifts of *company products* and coincidentally highlighted the importance of *other in-kind gifts* from companies and other donors.

Annual Funds

Table 5 presents data about alumni/ae support of their alma maters through the annual fund. Although the response rate of alumni/ae dropped slightly in 1984-85, the number of donors, total amount and average size of gift increased. Gifts made through the annual fund provided 38.5 percent of total alumni/ae support. Their importance has varied over the years. In the late 1960s they accounted for less than a third of total alumni/ae support, in the 1970s just over 40 percent and in the last few years between 35 and 40 percent.

Alumni/ae of various types of institutions respond differently to annual-fund solicitations, as can be seen in *Table 6*. Over the years private institutions, especially the general baccalaureate colleges, have relied more heavily than others on annual fund drives. Excepting the specialized category, private institutions have received much larger average gifts from a far greater proportion of their alumni/ae than have public institutions.

Bequests and Deferred Gifts

Bequests and deferred gifts accounted for 27.6 percent of total support from individuals in 1984-85, almost the same as in 1983-84. More than four fifths of these gifts were reported by the private colleges and universities. Prior to 1979-80 these special forms of gifts averaged about 35 percent of all gifts from individuals. Since then they have averaged about 28 percent. They tend to be somewhat "lumpy" because of their unpredictability. Details about their importance to the various types of institutions can be found in Appendix Table A.

Table 5. Alumni/ae Support of Colleges and Universities and the Annual Fund

Matching Gifts

Corporate funds resulting from matching-gift programs are of varying degrees of importance to colleges and universities, as can be seen in *Table 7*. As in the past, they were a larger share of total corporate support for private colleges than for public institutions and were of greater importance to the comprehensive and baccalaureate institutions than to other types. In 1983-84 and 1984-85 they provided 7.4 percent and 7.5 percent, respectively, of total corporate support.

Company Products and Other Property

Gifts of company products and other types of property have grown dramatically. Between 1983-84 and 1984-85, gifts of company products and all other in-kind items from companies increased by more than 50 percent, from $159.8 million to $248.3 million, and gifts of tangible property from all other sources grew by more than a quarter, rising from $119.7 million to $151.9 million. Some of this increase undoubtedly is the result of better reporting by the respondents. The survey started collecting the data in 1982-83, and it takes time for data-recording procedures to be adjusted to new requests.

The public and private doctoral institutions received the bulk of all the in-kind gifts—$271.7 million, or more

Table 8. Percentage Changes in Average Voluntary Support per Institution by Purpose, 1983-84 to 1984-85

*Figures differ slightly from those reported in 1983-84 because of adjustments in some of the data.

(Figures in parentheses show percent of total in each column.)

than two thirds of all reported ($400.2 million). The public baccalaureate, specialized institutions and two-year institutions, however, received larger average in-kind gifts than did their private counterparts. (See Appendix Table A for details of these gifts by type of institution.)

In-kind gifts from corporations—products and other property—amounted to 18.8 percent of all corporate support, up from 15.1 percent in 1983-84. Colleges usually report product gifts at market value (list price), a higher value than the tax-deduction value reported by corporations. Corporations value these gifts at either manufacturing cost or half the difference between manufacturing cost and market value, depending on whether the donation qualifies for an enhanced deduction.

The Purposes

This is the second year of reporting under the new system of classifying donor purposes. More definitive comparisons are therefore now possible than in the 1983-84 survey. (See *Table 8.*)

The proportion of gifts for capital purposes increased slightly in 1984-85, due in part to the increase in in-kind gifts and in better reporting of these gifts. In the past many institutions reported only cash gifts in the survey; efforts to rectify this omission may therefore account for some of the increase. Still, it is clear that gifts of company products have increased substantially.

Unrestricted gifts, both for current operations and for endowment, continued to decline as a share of total sup-

port in 1984-85. These gifts, which accounted for almost a third of all voluntary support in the late 1970s, have gradually slipped to less than a quarter.

The patterns of the total group of survey respondents versus the core group were quite similar. Any differences highlight the problem of making two-year comparisons when the number and characteristics of the respondents vary from one year to the next.

Respondents were asked for specific details about how restricted gifts were to be used. As can be seen in *Table 9*, not all institutions can provide these details, but enough do for an acceptable picture of what fund raisers are asking for and how donors are responding. The largest share of current-operations support is channeled into research, and academic divisions—schools and departments—are pinpointed for the next largest share after unspecified "other" purposes, a category that is often used as a catch-all. The donor purposes of gifts for current operations are remarkably similar for both private and public institutions

Donors can specify the purposes to which income on their endowment gifts may be put, and these differ somewhat from the restrictions on gifts for current operations. Student financial aid and faculty and staff compensation attract the largest share of these endowment gifts. Many colleges are actively raising money for student aid to relieve the pressure from cuts in federal programs, and are also establishing endowed chairs to counter the negative effects of inflation on faculty salaries.

Size of Gifts

Respondents were asked for details about gifts for current operations that were under $5,000 or $5,000 and over. Not all institutions could provide these data, nor did all report both the number and the amount of the gifts. *Table 10* shows the data reported; the totals represent 65.4 percent of total support for current operations from all individuals.

Contrary to the results in 1983-84, gifts under $5,000 produced larger total amounts than did gifts of $5,000 or over, except for the private doctoral institutions. In 1984-85 the number of gifts of $5,000 and over was a mere 0.6 percent of all gifts, and they accounted for 39.0 percent of the dollars. In 1983-84 the gifts over $5,000 represented 52.0 percent of the dollars. One predicted result of the lower tax rates for high-income individuals enacted by ERTA was a decrease in the size of major gifts. These data appear to bear out this prediction.

Comprehensive Institutions: Strong postbaccalaureate programs, but not significant doctoral-level activity, granting a minimum of 30 postbaccalaureate degrees (including master's and some doctorate and first-professional degrees).	**Comprehensive Institutions — Private**	18
	Comprehensive Institutions — Public	24
General Baccalaureate Institutions: Primary emphasis is on general undergraduate, baccalaureate education, granting degrees in 3 or more baccalaureate programs or in interdisciplinary studies (with over 75 percent of their degrees at the baccalaureate level or above and fewer than 30 of them for postbaccalaureate work).	**General Baccalaureate Institutions — Private**	28
	General Baccalaureate Institutions — Public	44
Professional and Specialized Institutions: Baccalaureate and postbaccalaureate institutions with a programmatic emphasis in one area, usually a professional field such as business, engineering, law, medicine, theology or art.	**Professional and Specialized Institutions — Private**	44
	Professional and Specialized Institutions — Public	48
Two-year Institutions: Confer more than 75 percent of their degrees or awards for 2 years of work and less than 25 percent at the baccalaureate or postbaccalaureate level. (Institutions with a two-year upper-division program do *not* fall in this category, since they grant baccalaureate degrees.)	**Two-Year Institutions — Private**	50
	Two-Year Institutions — Public	52

Independent Schools

Boarding schools: Schools enrolling 95 percent or more boarding students.	**Independent Elementary and Secondary Schools**	56
Boarding/day schools: Schools enrolling between 50 and 94 percent boarding students, with the balance day students.		
Day schools: Schools enrolling 95 percent or more day students.		
Elementary schools: Schools with students in any grade PS-9, but none in grades 10-PG (*e.g.*, PS-6, K-9, 6-9)		
Secondary schools: Schools with students in any grades 10-PG, but none in grades PS-6 (*e.g.*,7-12, 9-12, 7-PG)		
Elementary/secondary schools: Schools with students in any grades PS-6 *and* any grades 10-PG (*e.g.*, K-12, 5-12, 1-10)		

Technical Notes:

A. In the listing on the following pages, Column 27 does not show the total operating expenditures of the reporting institutions; it excludes the operating costs of dormitories, dining halls, student stores, and other "auxiliary enterprises" as well as all outlays of a capital nature.

B. In some instances the number of institutions listed is greater than the number tabulated, for two reasons: (1) some multicampus institutions are shown in summary as well as in detail; and (2) some of the component professional schools of major institutions are also listed separately.

Independent Elementary and Secondary Schools

Survey Results

The number of schools responding to the survey dropped for the second year in a row. The 434 respondents in 1984-85 reported receiving an average $697,471 per school, which is a 12.3 percent increase over the average $621,107 recorded by 451 schools in 1983-84. Total support reached $302,702,537, $22,583,170 more than the $280,119,367 in the previous year.

The breakdown of support by type of school according to level of program and type of student body is shown in *Table 11*. Girls schools received the smallest amount of support, both on average and in total dollars. Although the coeducational schools raised the largest amount of dollar support, the boys schools had the highest average, $960,542 compared with $670,291 for the coed schools and $584,894 for the girls schools.

Since the number of participants varies from year to year, two types of analyses are necessary to show changes over time. Using an average per school corrects for different respondents in each year. Using a "core" group of schools reporting in both years shows actual changes from year to year, but results in a smaller group for analysis.

The Donors

Table 12 presents changes in support by donor group in both ways. Gifts from all types of individuals—alumni/ae, parents and others—all increased by substantial margins, but corporate support jumped by no less than 37.0 percent. The experience of the core group showed a similar pattern, although slightly different in degree.

Appendix Table D presents more detailed breakdowns of the amounts received in 1984-85 from each donor group by type of school.

Table 11. Total Voluntary Support by Type of Independent School, 1984-85

Type of School	Girls	Boys	Coeducational	Total
Day Elementary	$ 142,861 (1)	$ 2,455,960 (7)	$ 12,278,165 (58)	$ 14,876,986 (66)

No. Schools Reporting	451	434		340

(Figures in parentheses show percent of total in each column.)

Alumni/ae gifts to the *annual fund* have always been important to the independent schools, and 1984-85 was no exception. A record 29.7 percent of alumni/ae responded to annual-fund solicitations (up from 28.8 percent in 1983-84) and gave a record average gift of $141.20, 9.3 percent larger than the average $129.21 in the previous year.

Bequests and *deferred gifts*—such as trusts, pooled income funds and annuities—are often used by individuals in their estate planning to benefit the independent schools. These gifts increased in 1984-85, providing 10.0 percent of all contributions from individuals and 7.7 percent of total voluntary support. Additional details about bequests and deferred gifts by type of school can be found in Appendix Table D.

Corporations support independent schools through *matching-gift programs* and through grants of *in-kind items* as well as of cash. In 1984-85 the corporate total from matching gifts was $4,762,329, up 12.7 percent from the previous year. The average match of $346.60 was 1 percent lower than the year before's $349.98. At $839,375, gifts of company products and other property are only a small proportion of total corporate gifts. These special forms of corporate giving acounted for 36.4 percent of total corporate support in 1984-85.

The Purposes

Table 13 looks at changes between 1983-84 and 1984-85 in the purposes specified by donors for their gifts. More gifts

The Ten Schools Reporting the Most Voluntary Support:

Peddie School	$6,125,215
Phillips Academy	5,660,379
Deerfield Academy	5,106,021
Phillips Exeter Academy	4,989,682
Lawrenceville School	4,919,204
Culver Academies	4,480,942
Choate Rosemary Hall	4,303,588
Groton School	4,154,342
Hotchkiss School	4,050,291
Hill School	3,576,421

The Ten Schools Reporting the Most Corporate Support:

(Figures in parentheses show percent of total in each column.)

were given for capital purposes than for current operations, and the former increased at greater rates than the latter. The largest average gift was for current operations without restrictions on its use, but these unrestricted gifts were a smaller share of total support than in the previous year. Overall, unrestricted gifts for both current operations and endowment dropped to 48.8 percent of total support in 1984-85 from 50.5 percent in 1983-84.

The patterns of the core group generally followed those of all respondents. Fuller details about donor purposes by type of school can be found in Appendix Table D.

Table 14 examines the purposes designated by donor groups. All but three donor groups gave a larger share of their support for capital purposes than for current operations in 1984-85. Almost all of the gifts for current operations were unrestricted. A larger proportion of the capital gifts from alumni/ae were for unrestricted endowment; the largest share of capital gifts from the other donor groups, however, were made in the form of property, buildings or equipment, mostly from individuals.
